status

focused on developing, maintaining, and sharing open-source software that assists developers in their creative pursuits

---

wyyerd intuition

engineering

frontend developer

2022.06 - 2022.02

product

a web app aimed at internet service providers that assists employees in scheduling and completing a variety of tasks ranging from managing network infrastructure to analyzing client subscriptions

responsibilities

- provide thorough code reviews with an emphasis on iteration

- refactor a number of entrenched components in order to enable a requested feature or fix an outstanding bug while minimizing breaking changes to existing apis

- adapt third-party component libraries to support undocumented use-cases

- participate in establishing best practices for frontend development with a focus on component composition that is fairly formulaic in implementation and resulted in code that was more straightforward to reason about

- participate in sprint planning and issue prioritization

- collaborate with teammates on problems where unobivous or unique solutions were required

tech

vue@2 apollo bootstrap playwright typescript scss graphql

git

native roots

operations

frontend developer

2021.04 - 2020.12

product

two unique web stores each serving their own market of cannabis consumers either in colorado, united states or manitoba, canada

responsibilities

- provide clients with a simpler less error-prone purchase flow

- revive an abandoned and brittle nextjs codebase

- stabilize repository via typescript, more comprehensive e2e test, simpler environment/dependency management, and a modernized palette of development scripts for a streamlined workflow

- migrate from shopify api to dutchie plus api for a smoother cannabis shopping experience

- resolve outstanding wcag 2.1 level aa and ada title iii accessibility lawsuit

tech

nextjs react typescript graphql nodejs cypress firebase git

---

confident cannabis

wholesale

junior developer

2020.04 - 2019.05

product

a b2b marketplace/network that helps licensed businesses in the cannabis industry manage and transact tested inventory

responsibilities

- empower clients by simplifying their operations in a tightly regulated industry

- improve experience around order creation/management

- collaborate with teammates on monthly milestones

- identify, describe, and patch bugs

- maintain, design, and implement react forms/inputs

- maintain, design, and implement react hooks

- maintain and refactor legacy react components

tech

react typescript material-ui redux storybook git

---

datasplice

research & development

apprentice developer

2018.05 - 2016.05

product

an offline-first/mobile-first web app that helps enterprise organize, navigate, and manipulate data regardless of location

responsibilities

- collaborate with teammates towards providing clients with a flexible and reliable platform for assisting workers out in the field

- identify, describe, and patch bugs

- maintain and integrate bluetooth hardware for cordova ios extension

- design and implement a robust component for marking-up/annotating images on the fly

- maintain, design, and implement a shared react components library

- begin refactor of core app functionality towards improved readability/testability by way of redux-saga

tech

react redux redux-saga cordova coffeescript git

---

galvanize

fullstack web development

student

2016.04 - 2015.10

description

an immersive six-month bootcamp that covered technologies, patterns, and best-practices applied throughout industry

tech

javascript nodejs git css express postgresql
